Small Cell Deployments - Size Matters

In the world of small cells, size is a really big deal. To deliver small cell solutions in the most constrained spaces, RFS has engineered the world's smallest diplexer. Designed and built with proven building blocks according to exacting technical specifications including a lower rejection (30dB) between bands, this diminutive diplexer delivers all of the quality and performance RFS is known for in the tiniest possible package.

FDPAW3040 Super Small Cell Diplexer

- Smallest and lightest diplexer on the market
- 1850-1915/1930-1995 and 1695-1780/2110-2360
- Dual unit with 2.2-5 Connectors
- Best-in-class PIM and power handling, low insertion loss
- IP67 class protection with a vented enclosure
