

Target your home's weak signal areas.

With its considerable power, the Home MultiRoom delivers reliable cellular connectivity throughout a coverage area of three large rooms; up to 5,000 sq. ft.

The Home MultiRoom by weBoost is the ideal multi-user cell signal booster for anyone who is experiencing weak signal or unresolved connectivity issues within a specific area of their home.

With 65 dB in max gain, the Home MultiRoom offers residents the most reliable cell signal possible on all available network speeds. Generating up to 21 dBm in uplink-output power, it can also reach cell towers at distances up to 23% farther than its predecessor; the weBoost Home 4G. With Home MultiRoom, users can enjoy fewer dropped calls, better voice quality, uninterrupted texts, faster data speeds, better streaming, and improved hotspot capability.

Home MultiRoom is compatible with all cell phones, tablets, hotspots, and cellular-connected devices on all US mobile carriers—including Verizon, AT&T, T-Mobile, US Cellular and more. With the addition of Band 25, Sprint customers will also enjoy enhanced LTE signal coverage.

HOME MULTIROOM
470144

Key Features

With up to 12 dBm in total downlink-output power, Home MultiRoom can produce up to 91% more coverage area than the weBoost Home 4G; its predecessor among home cell signal boosters.

The 75 Ohm Home Complete Outside Directional Antenna pulls in cell signal with increased gain. It's made to fit an antenna pole or clamp to a home's rooftop vent pipe.

With a set of wall-mount brackets (designed to use with 3M Command strips) and flat window cable, the Home MultiRoom offers homeowners the ease and convenience of tool-free installation.

From its sleek, cast aluminum booster to the universal appeal of its stylish fabric-covered inside panel antenna, the Home MultiRoom is a natural fit with contemporary home décor.

SPECS

NAME	MODEL	USERS	MAX UPLINK POWER	MAX DOWNLINK POWER	MAX GAIN	MSRP
Home MultiRoom	470144	Multiple Users	Up to 21 dBm	Up to 12 dBm	65 dB	\$549.99

INSIDE THE BOX

All components needed for a tool-free installation in one complete package. This includes:

OUTSIDE DIRECTIONAL ANTENNA 314445

Designed in the USA, comes with an easy-to-adjust clamp

FABRIC INSIDE PANEL ANTENNA 314440

Proprietary weBoost design, features a built-in kickstand

IDEAL USE-CASE SCENARIO

For anyone experiencing connectivity issues when using their phones, tablets, or devices within specific areas of their home (up to 5,000 sq. ft.).

WHO IS MOST LIKELY TO USE THIS PRODUCT?

- Anyone experiencing dropped calls or slow data at home
- People who seek better cell coverage in a targeted area
- Those who require a drill-free, non-invasive installation
- Rooms with energy-efficient windows or LEED materials
