

Wireless Solutions Universal Stand-Off Adapters For Cable Mounting

Ensure Reliability of Your Site

Wireless Solutions' Universal Stand-Off Adapters enable hangers to be mounted to 1" OD or larger members and provide 2" a stand-off distance. Removing a loose threaded insert quickly converts this Stand-Off to accept Snap-In Hangers. Includes all necessary slotted hex head bolts, hex nuts and lock washers. Stand-Offs are slotted to accept round member adapters or banding straps for mounting on any size round tower member. These Stand-Off Adapters are manufactured from stainless steel to resist corrosion.
