

Perimeter Sway Bar for Parabolic Antenna 6ft

Product Description

The perimeter sway bar reduces vibration of the reflector and increases stability of the antenna in worst case conditions. The perimeter sway bar has no impact to the nominal survival or operational wind speed performance of the antenna.

Features/Benefits

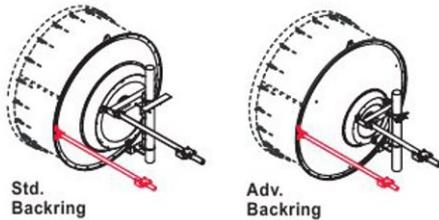

Technical Specifications

Product Type	Reinforcement Hardware
Kit Type	Perimeter Sway Bar
Diameter, ft (m)	6 (1.8)
Material	Hot dip galvanised steel

Notes

The perimeter sway bar includes only the red marked parts and fixing hardware
 Only applicable for PAD, PADX, DA, DAX, SU, SUX, UA, UDA, and UXA antennas
