Cable Pro® Universal Installation Tool: SNSUNI

Features

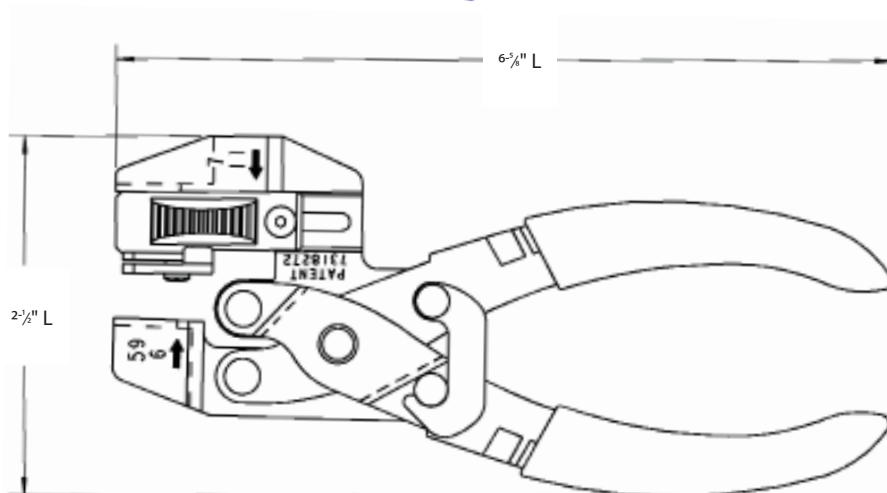

- Riveted construction.
- Releasing the handle lock activates the built-in handle spring mechanism, which opens the tool jaws.
- Easy to use - selecting the correct position of the slide for the cable type in use is indicated on the tool.
- Black nylon slide is pushed up for installation of connectors on 59 and 6 series cables.
- Black nylon slide is moved down for installation of connectors on 7 and 11 series cables.
- Slide includes a T-slot to prevent the tool tilting.
- Support plate centers connectors for 59 and 6 series cables.
- Support plate fingers provide 300° support during connector compression.
- Part number is stamped on the tool for easy identification.

SNSUNI
