

Solving In-Building Cellular Connectivity for Business

ABOUT WILSONPRO | PROFESSIONAL-GRADE CELLULAR SIGNAL AMPLIFIERS

Whether it's manufacturing or healthcare, retail or hospitality, sales or management—or virtually any industry in between—mobile devices are critical to job performance at almost any organization.

WilsonPro offers commercial solutions for cellular signal enhancement. Our professional-grade amplifiers work with all major U.S. carrier networks to ensure you get the best signal possible.

Our FCC-approved WilsonPro systems are well-suited to overcome any connectivity challenges specific to your building—from office high rise to industrial warehouse. Reliable cell signal can mean increased productivity, greater customer satisfaction, improved security, and much more.

The key characteristics of WilsonPro cell signal amplifiers:

- Support all mobile devices, all major U.S. carriers.
- Simultaneously boost signal for multiple users.¹
- Self-regulating; no need to retune for best signal.
- Nationwide network of certified installers available.
- The nation's only FCC-certified in-line amplifier; featuring the longest cable run (w/o signal loss) in the entire industry.²
- Built in the U.S. and backed by U.S. customer support.
- The only true "cloud-based" remote monitored amplifier with remote system management and firmware updates.³
- The industry's only multi-port output amplifier; resulting in the largest coverage area possible from a single amplifier.
- The only cell signal amplifiers to offer Multi-Tower Targeting (MTT) Technology; featuring our industry-first, three donor-antenna-the port configuration.
