

Installation Instructions

BAND-IT®

D51089, D51289, D51389 Mounting Plate

BAND-IT® Mounting Plates can be used as a heavy duty bracket securing hardware to poles. There are two sizes of Mounting Plates to accommodate ¾" wide Giant Band with Buckle or 1-1/4" wide Giant Band with Buckle. When using Giant Band and Buckle, we suggest double wrapping each band clamp and tensioning with our G40269 Giant Banding Tool.

Alternative to our Band and Buckle system: Fasten the Mounting Plate to the pole using our same Giant Band and our Bolted Band Retainers. This option allows the installer to tension the band without requiring the G40269 Banding tool and Ear-Lokt buckles. See part numbers listed below as well as installation instructions for the Bolted Band Retainer listed on our website under product instructions as: D50089/99 & D50489/99 Bolted Band Retainer.

Ear-Lokt Buckle

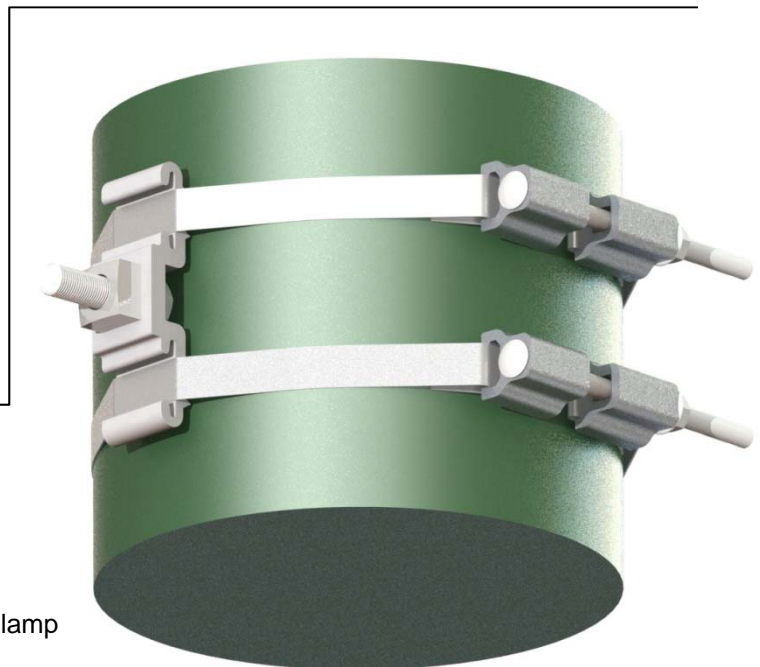

Use double wrapped band clamp applied with G40269 tool for maximum strength and holding power.

D51089

- Use G43099 Band
- Use G44099 Buckle

D51289, D51389

- Use G43299 Band
- Use G44299 Buckle

Bolt Clamp – See installation instructions P07387

D51089

- Use G43099 Band
- Use D50089 Bolt Clamp

D51289, D51389

- Use G43299 Band
- Use D50489 Bolt Clamp

Note: Mounting Plate and Buckle/Bolt Clamp positioned as shown for illustration clarity only. Buckle or Bolt Clamp should be on opposite side of pole as Mounting Plate for highest strength.
