

## Roof Top Structures

### Heavy Duty Roof Mounts

Trylon's non-penetrating Heavy Duty Roof Mounts are truly universal since they can be used as a single roof mount, or be extended to a versatile multi-panel sector frame mount (see following page).

The main mounting pipes are offered in three sizes (2 3/8", 3 1/2", and 4 1/2" OD) and two overall lengths (7' and 10'), which gives you the ability to attach a multitude of antennas. The unique strut design allows a  $\pm 2^\circ$  panning adjustment of the mounting pipe from vertical, which is very useful for sloped roof tops.

Each roof mount kit comes complete with a 7' x 7' ballast tray that allow standard off-the-shelf 2' x 2' patio stones to be used as counterweight (sold separately). Additional ballast trays are optional for those heavily loaded conditions. Please call us to determine when to use extra trays and how many patio stones are required.

All material is hot dip galvanized to weather the elements.

Please call if you require a different pipe length.
