

Accessories for BD Series Dehydrators

Start-up and Manifold Kits - GLK and MLK, and Maintenance Kits

PRODUCT DESCRIPTION

Dehydrator start-up kits and manifold kits include all air fittings and manifolds for interconnection of the BD series dehydrators with pressurisable antennas, transmission lines and feeder systems. Maintenance kits are recommended to ensure the highest level of reliability and lowest lifecycle costs of the dehydrators.

FEATURES / BENEFITS

- Start-up Kits provide a complete range of fittings and accessories for installation and connection to a single system, or to corresponding manifold kit to support multiple antennas and feeder systems
- Check valves and pressure gauges are included to allow isolation of feeders for detection of air leaks
- Optional flow meters provide the clearest indication of air leaks

DETAILS

Product Type	Automatic Dehydrator Accessories
